Re: Thickness testing of veneer ties

Dear Mark:

This is to confirm that we received a number of 7/8" x 6.6" long veneer ties for thickness testing. We used a micrometer to measure the thickness of five separate ties to the nearest 0.001" (0.025 mm).

We found the thickness to range from 0.031" to 0.036" (0.787 mm to 0.914 mm). This meets Ontario Building Code 9.20.9.5 (b) requirement for a minimum 0.76 mm thickness.

Yours truly,

Stephen Boyd, P.Eng.
